EDUCATION

Arizona State University, W. P. Carey School of Business

M.S. Business Analytics (STEM-designated)

Aug 2021 – May 2022

Tempe, AZ

Birla Institute of Technology & Science (BITS Pilani)

B.E. (Hons.) Computer Science

Aug 2014 – May 2018

Dubai, UAE

PROFESSIONAL EXPERIENCE

G2 | Sr. Technical Product Manager, Central & Vendor Experience

Feb 2026 – Present | Austin, TX

- **Agent Chatbot:** Grew SMB vendor budget utilization 14% in a test market by launching an AI chatbot that auto-qualifies buyers into agent-verified leads, a new product priced below human-verified leads; 23% form completion vs. 21% for static CTAs.
- **Buyer Workspace:** Raised buyer appointment show-up rate to 76% vs. 56% in the control by building a workspace where buyers choose vendors and self-schedule, or set a preferred callback time, while vendors still get the contact details they need.
- **Buyer Friction:** Reached 43% buyer opt-in to a webcall experience in August, then averaged 0.7% WoW growth over the next 3 weeks, by removing phone-number collection (a major pain point from constant vendor calls) and routing buyers to webcall.
- **Buyer Platform:** Drove \$105,000+ in vendor-appointment revenue in August and an 89% improvement in advisor follow-up tracking by building the buyer-accounts platform (in progress) with AI scoring across 3M+ profiles to flag repeat and cross-sell targets.
- **Call Scoring:** Cut advisor note-taking from 20+ minutes to 4 and delivered leads to vendors 33% faster by auto-scoring calls against 16 benchmark checks from Gong transcripts, with live post-call feedback.
- **AI Platform:** Delivered 2 PRs (9,000+ lines, 81 files) and 26 Jira tickets in a single 72-minute run by architecting Forge, a 9-phase agentic workflow (plan through deploy) with 9 specialized subagents and ~35 background agents.
- **Growth:** Cut time-to-first-call by 2.2 minutes and lifted form fills 8%+ MoM by architecting a real-time Twilio and 8x8 telephony integration.
- **Partners:** Drove 46% partner channel growth in 2 months by launching a PartnerStack-integrated partner portal.
- **Matching:** Improved buyer-vendor match relevance 22% YoY and pay-per-lead vendor participation 15% with a rule-based scoring engine.
- **Sales:** Helped lift sales revenue 16% YoY by integrating the product catalog with SugarCRM to focus Sales on top vendors.

Gartner, Inc. | Technical Product Manager, Platforms & Vendor Ecosystem

Oct 2022 – Jan 2026 | Austin, TX

Owned roadmap and delivery for platform products serving ~2,000 vendors and partners; worked with 5 engineers across 2 squads

- Improved conversion capture 12% over two years by redesigning the buyer conversion funnel with consistent data schemas on a Kafka-based event architecture.
- Grew vendor adoption 20% YoY by launching a self-service vendor portal with advanced bidding, automated invoice generation, and real-time performance visibility.
- Cut the end-of-month invoicing cycle from 8 days to 2 by building an end-to-end data pipeline from buyer leads to billable usage to financial statements.
- Enabled 83% of vendor accounts to be filled with third-party data without re-contacting vendors, and reached 90% data refresh reliability against a 5-minute SLA, by leading the ZoomInfo and Clearbit integrations.

E2open | Principal Product Manager, Sales & Vendor Platforms

May 2022 – Oct 2022 | Austin, TX

- Improved data accuracy 80% and month-end close accuracy 40%, and removed 2,700+ duplicate campaigns, by standardizing vendor master data and consolidating overlapping campaigns.
- Sustained 87% accuracy in payment collection and invoice generation, with business continuity for 130+ vendors, by leading the MVP of the NetSuite and Salesforce integration for all vendor financials.

Talabat (Delivery Hero) | Senior Business Analyst, Strategic Analytics & PMO

Nov 2020 – Aug 2021 | Dubai, UAE

- Cut payroll input errors 45% and processing time 30% by designing and launching an automated dark-store payroll system.
- Reduced customer churn from 4.5% to 2.9% by partnering with engineering on e-wallet churn prediction models.
- Exceeded loyalty campaign participation targets by 45% by driving campaign strategy through UI improvements.
- Cut manual reconciliation 50 minutes per day per team by automating data pipelines across CMS, Salesforce, and billing.

Amazon | Data Analyst, Strategy (Operations & Process Improvement)

Aug 2019 – Nov 2020 | Dubai, UAE

- Built the first automated data-quality monitoring for warehouse operations, later adopted regionally, by shipping SQL and R anomaly detection.
- Reached 90%+ reporting accuracy by standardizing EMEA employee attendance data collection across warehouses.

PROJECTS

Dance Studio Fee Management Platform | Product Owner & Builder

github.com/aroshapattnayak/narthana-studio-manager

- Cut weekly payment reconciliation from ~30 minutes to under 2 for a 64-student studio with a mobile-first React and Firebase app (real-time sync, offline persistence, GitHub Actions CI/CD) at zero infrastructure cost.
- Onboarded a second studio of 80+ students in 6 hours by extending the platform beyond the original 64-student studio; now expanding to additional price tiers, with pilot metrics (payments and invoices processed, payment reminder accuracy) to be tracked.

SKILLS

Product: Roadmapping, OKRs, PRDs, RICE, A/B testing, user research, Agile/Scrum, go-to-market, north star metrics.

Technical: SQL, Python, R, React, Node.js, Firebase, GitHub Actions, Kafka, API design, Tableau, Looker, Salesforce, Jira.

AI/ML: Agentic workflows, MCP, LLM evaluation, LiteLLM orchestration, prompt engineering, RAG, Claude/GPT/Gemini APIs.
